

Our Resurge staff has paired compassion and expertise with a state of the art veterinary surgery and rehabilitation facility. Dr. Dena Lodato DVM, MS, ACVS, CCRP has been a surgeon in the gulf coast region since 2010. She is board certified through ACVS, certified in pain management, and canine physical rehabilitation. Her areas of interest are stifle disease, fracture management, intervertebral disc disease, pain management, regenerative as well as rehabilitative medicine. She prides herself in client communication and follows her patients through the entire process from surgery to recovery.

# NEW BEGINNINGS.

## Why go see a specialist?

A veterinary surgical specialist is generally needed when your pet has an orthopedic, neurologic, or soft tissue condition where advanced care is warranted. Veterinary Surgeons routinely perform many advanced procedures daily. They have specialized training, equipment, and staff to help minimize complications and optimize recoveries.

## NEW LIFE.

Our Physical Rehabilitation department supports our patients and clients throughout the recovery process. Dr. Lodato is certified in canine rehabilitation and understands how surgical outcomes, injuries, and degenerative conditions can improve when the right aftercare and support is given. Our staff therapists, Robert Porter CCRP and Melissa O'Brien RVT, CCRP, have extensive experience in post surgical and injury rehabilitation. They work closely with Dr. Lodato so that every detail is looked after from the time of surgery to rehabilitation to a new beginning and improved quality of life.

## Regenerative Medicine

Resurge is dedicated to the pursuit of the best possible outcome for your pet. Our rehabilitation service as well as hyperbaric therapy can help maximize outcomes and create an optimal healing environment. Our certified treatment personnel are here to help.
